

Executive Summary:

Dental Clinic Management System (MVP to Full SaaS Expansion)

Introduction

This document outlines the proposed **Dental Clinic Management System**, strategically developed as a new SaaS product aligned with the This Dental Clinic Management System is designed to be sold independently to dental clinics and dentists nationwide, fully compliant with data privacy requirements and structured for scalability as a standalone SaaS. The system is designed to be sold independently to dental clinics and dentists nationwide, with optional **exclusive pricing discounts for PDA members**.

The strategy is simple: **Build a strong MVP**, go-to-market fast, secure initial clinics, then gradually deploy Phase 2 and Phase 3 advanced features. This creates a predictable Monthly Recurring Revenue (MRR) model and positions the product as a top-tier dental software solution in the Philippines.

Possible Partnership

Although the system is built to operate **independently**, there is long-term potential for a **partnership with the Philippine Dental Association (PDA)** in the form of voluntary member discounts or co-marketing arrangements. This would not require using or accessing PDA membership data.

1. The Market Opportunity

The Philippine dental industry has over **15,000+ clinics** nationwide. Current dental software solutions are either:

- Too expensive
- Not localized
- Overly complex
- Outdated interfaces
- Lacking mobile-first design
- Missing AI capabilities

Competitors include:

- Tabang.AI (PH) – basic EMR & charting
- SeriousMD – not dental-specific
- EZDent / Dentrix – expensive imports

*This creates a strong market gap for a **clean, affordable, modern, AI-ready Philippine Dental Software**.*

2. Objective of the Project

1. Build and launch a **Dental Clinic SaaS System** with:
 - Fast MVP development
 - Clear market fit
 - Recurring subscription revenue
 - Nationwide scalability
2. Offer **discounted pricing** for verified PDA members (voluntary input of PDA ID by dentists).
3. Expand features over time based on adoption and customer demand.

3. MVP Feature Set (Version 1.0)

The MVP is designed to be **lean, fast to build, and highly usable**. It includes all essential modules required by clinics to operate daily.

A. Patient EMR (Lite Version)

- Patient profile
- Medical/dental history
- Allergies
- Previous visits log
- Treatment notes

B. Appointment & Calendar System

- Dentist schedule
- Clinic calendar (daily/weekly/monthly views)
- Walk-in management
- SMS reminders (via gateway)

C. Billing & Receipt Module

- List of dental services with pricing
- Invoice generation
- Payment tracking
- Printable/emailed PDF receipts

D. Digital Odontogram (MVP)

- Adult & pediatric tooth charts
- Click-to-mark diagnosis & procedures
- Visual indicators for fillings, extraction, RCT, implants, etc.
- Notes linked to specific teeth

E. Prescription Builder (e-Rx)

- Template generator
- Dentist's PRC number (manual input by dentist)
- Signature upload
- Clinic logo support
- Printable PDF

F. File Upload Module

- Upload X-rays, intraoral photos, documents
- Basic image viewer

G. User Roles & Permissions

- Dentist
- Secretary/assistant
- Clinic manager/owner

H. Basic Dashboard

- Daily earnings
- Monthly earnings
- Total patients
- Top procedures

4. Phase 2 Features (Post-MVP, After Initial Clients)

These modules will be introduced once the system gains traction.

A. Inventory Management

- Supplies tracking
- Low-stock alerts
- Expiry reminders

B. Multi-Branch Management

- Branch selector
- Consolidated dashboard
- Shared services and patient records

C. Patient Portal (Web/Mobile)

- Appointment scheduling

- Payment confirmations
- Treatment history
- Automated reminders

D. AI Assistance (Powerful Differentiator)

- AI auto-fill clinical notes
- Voice-to-text transcription during consultation
- AI follow-up reminders
- AI suggested treatment plans

E. Tele-Dentistry

- Online follow-ups
- Patient uploads images for remote assessment

F. HMO/Insurance Module

- Claim preparation
- Case documentation

5. Phase 3 (Long-Term SaaS Expansion)

- AI imaging interpretation (future)
- Oral health scoring
- AI diagnostics assistant
- Integrated clinic website builder
- Online booking widgets
- Kiosk check-in for bigger clinics

6. Pricing Strategy

Designed to be competitive and sustainable.

Standard Pricing:

Solo Dentist
Small Clinic (2–4 Dentists)
Multi-Branch Clinics
PDA Member Discount Pricing
Solo Dentist
Small Clinic
Annual Discount Option

7. Competitive Positioning

Your system is designed to beat competitors through:

1. **Affordable price point** vs Tabang.AI and SeriousMD
2. **Cleaner UI/UX** vs all existing PH apps
3. **AI-enabled features** (eventual roadmap)
4. **Faster onboarding** and easier usage
5. **Mobile-first experience**

Conclusion

This Dental Clinic Management System is a high-potential SaaS project with:

- Clear market need
- Low MVP development cost
- Strong recurring revenue model
- Competitive pricing
- PDA-aligned discount advantage
- Scalable features for long-term growth

With an estimated MVP investment of around ₱800,000 and low monthly operating costs, the product can break even with only 33 paying clinics and scale aggressively through PDA marketing and nationwide adoption.
